Taylor Sain

Merritt Island, FL | 901-279-3100 | taylorsain2025@gmail.com | LinkedIn | Portfolio Website

Professional Summary

Business Intelligence and Data Analytics professional with 5+ years of analytics and reporting experience across enterprise and K–12 environments. M.S. in Applied Data Science with expertise in Power BI, DAX, SQL, Snowflake, Tableau, and relational data modeling. Proven ability to translate business requirements into scalable dashboards, optimize data pipelines, and deliver actionable insights that support operational and strategic decision-making.

Key Skills

Business Intelligence & Data Analysis | SQL & Advanced Data Manipulation | Tableau & Power BI | Business Requirements & Stakeholder Analysis | Data Pipelines & Workflow Automation | Data Quality Assurance & Validation | Data Transformation & Integration | KPI Development & Performance Measurement | Technical Documentation | Root-Cause Analysis | Cross-Functional Collaboration

Professional Experience

Senior Technical Spec, HMH, Remote | Mar 2023 - Present

Lead data integration, analytics, automation, and BI initiatives, partnering with stakeholders to assess business needs, prioritize requests, and translate requirements into scalable data and reporting solutions.

- **Designed an enterprise Productivity Dashboard around 5 KPIs** identified through analysis and recommended to leadership, translating stakeholder requirements into reporting solutions, leading UAT, and improving executive performance measurement.
- **Built a Power BI state standards analytics dashboard spanning 11 states**, transforming unstructured Word reverse pacing guides into structured, standards-level datasets and developing interactive reporting to query standards coverage, lesson alignment, and instructional content usage.
- **Built a workforce analytics solution** integrating SAP timesheet data, employee-manager hierarchies, and date dimensions into a dimensional data model, **enabling 12 leaders** to analyze workload and time allocation across 65 employees.
- **Wrote and optimized SQL queries in Snowflake** to extract, join, and validate SAP time-tracking data, supporting manager-level dashboards and automated notifications aimed at improving on-time timesheet submissions.
- **Engineered a data pipeline integrating 73M+ Box metadata records**, applying data transformation and validation processes to support large-scale analysis, forecasting, archive planning, and enterprise reporting.
- **Optimized SQL queries, joins, and data transformations** supporting Tableau reporting, **reducing query execution time by 15%** while improving data accessibility and accelerating business insights.
- **Automated complex data workflows using Python and Power Automate**, including unstructured PDF processing and reporting solutions that reduced manual effort and **delivered $222K** in documented cost savings.

Freelance Data & Business Intelligence Consultant (Pro Bono), ESPN Academy, Remote| 2026–Present

Develop end-to-end BI solutions by transforming unstructured data, automating workflows, and building Power BI dashboards to drive enrollment insights and operational decisions.

- Designed and implemented a **3-table relational data model** integrating student, household, and enrollment records across multiple school years, establishing unique identifiers and data relationships to improve reporting accuracy and historical analysis.

- Developed **Google Apps Script automation** to process registrations for up to **3 students per submission**, integrate Google Forms data, update existing records, and prevent duplicate student and household entries, replacing manual data preparation with repeatable workflows.
- Built an interactive **Power BI dashboard with 4 executive KPIs** and custom DAX measures for distinct counts, rankings, and aggregations, enabling leadership to analyze enrollment trends across **8 school years**, student demographics, schools served, and academic support needs.
- Consolidated digital and handwritten registration forms using **AI-assisted data extraction**, transforming unstructured records into analysis-ready datasets and establishing a scalable foundation for enrollment reporting and program planning.

Math Teacher, Atlanta Public Schools, *Atlanta*, *GA* | Jul 2021 – Mar 2023

Applied quantitative analysis of assessment and student information data to support instructional and organizational decision-making.

- **Analyzed NWEA MAP Growth, PowerSchool, and student assessment data** to identify performance trends, learning gaps, and growth patterns that informed targeted instructional strategies and **contributed to a 12% increase** in student achievement.
- **Automated performance reporting processes, reducing administrative effort by 40%** while improving the consistency and accessibility of student-performance data for instructional leadership.

Education

M.S., Applied Data Science – Syracuse University
M.A.T., Secondary Mathematics – Relay Graduate School of Education
B.S., Mathematics – Spelman College

Technical Proficiencies

Programming & Data: SQL, Python, DAX, R, VBA, Google Apps Script
Business Intelligence: Power BI, Tableau, Tableau Prep, Data Visualization, KPI Development
Databases & Data Modeling: Snowflake, Relational Data Modeling, Dimensional Modeling, Data Validation, SQL Optimization
Data Engineering & Automation: ETL/ELT, Data Transformation, Power Automate, Google Sheets, Google Forms
Advanced Analytics: Statistical Analysis, Machine Learning, Forecasting, Exploratory Data Analysis
Development: Git, GitHub

Awards

Standing Ovation Award – CI&E Productivity Dashboard, HMH | 2026
